

Basic Level

Q 1 :- Retrieve the names of employees who earn more than the average salary of all employees.

Solution :- SELECT * FROM Employee
WHERE salary > (SELECT AVG(salary) FROM Employee);

Q 2 :- Find the employees who belong to the department with the highest average salary.

Solution :- SELECT * FROM Employee
INNER JOIN Department ON
Employee.department_id = Department.department_id
WHERE salary > (SELECT AVG(salary) FROM Employee);

Q 3 :- List all employees who have made at least one sale.

Solution :- SELECT * FROM Employee
INNER JOIN Sales ON
Employee.emp_id = Sales.emp_id
WHERE Sales.sale_amount is NOT NULL;

Q 4 :- Find the employee with the highest sale amount.

Solution :- SELECT Employee.name, Sales.sale_amount FROM Employee
INNER JOIN Sales ON
Employee.emp_id = Sales.emp_id
ORDER BY Sales.sale_amount DESC
LIMIT 1;

Q 5 :- Retrieve the names of employees whose salaries are higher than Shubham's salary.

Solution :- SELECT * FROM Employee
WHERE salary > (SELECT salary FROM Employee
WHERE name = 'Shubham');

Intermediate Level

Q 1 :- Find employees who work in the same department as Abhishek.

Solution :- SELECT Employee.name, Department.department_name FROM Employee
INNER JOIN Department ON

```
Employee.department_id = Department.department_id
WHERE Department.department_name =
(SELECT department_name FROM Employee
INNER JOIN Department ON
Employee.department_id = Department.department_id
WHERE Employee.name = 'Abhishek');
```

Q 2 :- List departments that have at least one employee earning more than ₹60,000.

Solution :- SELECT Employee.name, Department.department_name FROM Employee
INNER JOIN Department ON
Employee.department_id = Department.department_id
WHERE Employee.salary > 60000;

Q 3 :- Find the department name of the employee who made the highest sale.

Solution :- SELECT Department.department_name, SUM(Sales.sale_amount) FROM
Employee
INNER JOIN Department ON
Employee.department_id = Department.department_id
INNER JOIN Sales ON Employee.emp_id = Sales.emp_id
GROUP BY Department.department_name
ORDER BY SUM(Sales.sale_amount) DESC
LIMIT 1;

Q 4 :- Retrieve employees who have made sales greater than the average sale amount.

Solution :- SELECT Employee.name, Sales.sale_amount FROM Employee
INNER JOIN Sales ON Employee.emp_id = Sales.emp_id
WHERE Sales.sale_amount
> (SELECT AVG(Sales.sale_amount) FROM Sales)
;

Q 5 :- Find the total sales made by employees who earn more than the average salary.

Solution :- SELECT SUM(Sales.sale_amount) AS TotalSales
FROM Sales
JOIN Employee ON Sales.emp_id = Employee.emp_id
WHERE Employee.salary > (SELECT AVG(Employee.salary) FROM Employee)
;

Advanced Level

Q 1 :- Find employees who have not made any sales.

Solution :- SELECT * FROM Employee
INNER JOIN Sales ON Employee.emp_id = Sales.emp_id
WHERE Employee.name is NULL;

Q 2 :- List departments where the average salary is above ₹55,000.

Solution :- SELECT
Department.department_name,
SUM(Employee.salary)
FROM Employee
JOIN Department ON
Employee.department_id = Department.department_id
GROUP BY Department.department_name
HAVING AVG(Employee.salary) > 55000;

Q 3 :- Retrieve department names where the total sales exceed ₹10,000.

Solution :- SELECT Department.department_name,
SUM(Sales.sale_amount) FROM Employee INNER JOIN Department ON
Employee.department_id = Department.department_id
INNER JOIN Sales ON Employee.emp_id = Sales.emp_id
GROUP BY Department.department_name
HAVING SUM(Sales.sale_amount) > 10000;

Q 4 :- Find the employee who has made the second-highest sale.

Solution :- SELECT Employee.name, Sales.sale_amount FROM Employee INNER JOIN Sales
ON Employee.emp_id = Sales.emp_id
ORDER BY Sales.sale_amount DESC
LIMIT 1,1;

Q 5 :- Retrieve the names of employees whose salary is greater than the highest sale amount recorded.

Solution :- SELECT Employee.name FROM
Employee INNER JOIN Sales ON Employee.emp_id = Sales.emp_id
WHERE Employee.salary > (SELECT Sales.sale_amount FROM Employee INNER JOIN Sales
ON Employee.emp_id = Sales.emp_id
ORDER BY Sales.sale_amount DESC
LIMIT 1);
